Lessons Learned Management

Intuitive software allows a company to more formally manage their lessons learned by taking the process from the quickly forgotten, all-too-common handwritten list or spreadsheet to a formal program.

Each lesson learned is effectively communicated to the fleet based on established criteria, managed through assigned actions, and each location's outcome captured along with all related documentation...a tool for efficiently pursuing continuous improvement.

Simplifying the Complex

Photo Capture integrated

Key Elements

- ◆ A single system for all company lessons
- ◆ Process monitoring across the fleet is easy to manage
- ◆ Risk profiles created in association with the lesson
- ◆ Lessons are shared with others quickly and efficiently
- ◆ Sharing is by technology and other factors versus all or nothing
- ◆ Associated files & photos are embedded with the lesson
- ◆ Autonomous actions as well as manually entered are managed within the application.

Impact of process improvement

LESSONS LEARNED MANAGEMENT

- LLM -

A lesson entry system that allows for efficient administration, tracking, and communications with your entire organization:

Easy entry

Record every lesson from the office or in the field with ease and accuracy;

Pro-Active lessons

Better manage communications across the organization by forwarding only related lessons for consideration. Each location manages their own actions to ensure risk mitigation and improved performance;

Autonomous actions

An automated action is created and communicated via an email alert to the selected manager for evaluation and action;

Automated alert emails

Actions are mapped, stored, and tracked along with alerts being sent to the Assigned To and Responsible Person;

File storage

Manage all related lesson documentation and photos, regardless of file type. Access any file easily from anywhere, making retrieval easy and quick; and,

Reports

Easy-to-generate reports providing management a useful tool to ensures oversight, performance & statistical indicators and status monitoring.

“Only data used to inspire action is meaningful”
